Senator Mapp in his last announcement did not say that many of the State Departments are superfluous and that there are many useless offices being supported by the taxpayers. He favors a constitutional convention. His platform is appealing and many are discussing the question raised by him in his candidacy for Governor of Virginia.

Hon. John Ch.Bliley is declining to be a candidate for Governor, says it is too expensive. But few men are willing to make the sacrifice; he is unwilling to buck the triumvirate. John's case plainly and he is young enough yet to engage the powers that be in battle some day.

With three ring candidates in the field it looks like another entry is in order. If the cards can Mapp off a course, some of the organization Byrds will no doubt be withdrawn. The people are waiting for the entries to close in the gubernatorial handicap.

Congressman Walton Moore decides that he will not be a candidate for Governor this year. He is an able man. He comes out in a strong paper urging consolidation of many offices and uniform taxation.

Senator Byrd's friends here have in this issue a short sketch of his achievements and these friends will push his campaign for Governor in this county.

## Co-Ops At Washington

Representatives of 600,000 cooperating farmers gathered in Washington in the third cooperative marketing conference and were greeted by President Coolidge at the White House with the declaration that "It is particularly to be desired that our agricultural marketing organization be placed as soon as possible on a basis of the utmost security and stability. This I am convinced we shall best accomplish by developing the broadest and soundest program of cooperative marketing."

"More than anything else we need a generalization of farmers trained to cooperative marketing" the President continued, pointing out that the success of cooperative marketing is strictly dependent upon the loyalty of the farmers themselves to their own movement and said that "I want society as a whole to help, but I want the farmers to do their share and I warn them that this will be the lion's share."

Judge Robert W. Bingham, of Kentucky, chairman of the conference, declared that today, commodity cooperative marketing associations have the best financial record of all forms of business in the United States, stating that there have been more failures in the past three or four years among large banks of the country than among cooperative marketing associations.

## Big Comic Section

### N. Y. American Announces Twelve Pages for Next Sunday

The Sunday New York American announces a distinct innovation starting next Sunday—amplifying its great color comic section in the world. Beginning next Sunday readers will get twelve pages of comics instead of eight and the additional four pages will compare more than favorably with the list of universally popular comics that have been such a big factor in making the circulation of the New York American more than a million every Sunday. Such favorites as "Barney Google" and "Bringing up Father" will still be in the list and the new comics will continued an immediate success following. One special page—an entirely new idea—called "Serialized Comics" will be featured and it is promised that this page will be more interesting than a cross word puzzle. On account of this big 12-page permanent comic section the demand will be unusually big next Sunday and if you would avoid disappointment it would be a good idea to order your Sunday American in advance from your newsdealer.

## BYRD SEEMS SURE WINNER

### WINCHESTER SENATOR STRONG IN ALL PARTS OF THE STATE

The candidacy of Hon. Harry Flood Byrd for Governor of Virginia is enlisting support from all sections of Virginia. Never before in the State has a candidate for Governor shown such strength in the early stages of the campaign, as does Senator Byrd.

The predictions of Senator Byrd's friends before the announcement of his candidacy, that he would be a sure winner, should he throw his hat into the ring, have been more than justified by the support that has rallied to him since his announcement. For the first time in the history of Virginia politics, it seems that a candidate for the highest honor the State can confer is virtually assured of the Democratic nomination before the campaign has gotten well under way and that henceforth it appears that Senator Byrd's campaign will be a band wagon proposition.

It is being predicted by many Democratic leaders in Virginia, who are in close touch with the political situation, that Mr. Byrd will carry every Congressional District in the State and most of them by very substantial majorities.

Senator Byrd's active and successful leadership in State-wide issues and his personal success in business, have gained for him the admiration and confidence of the people of Virginia, is recognized as an active, fearless leader, who would make just the type of executive that Virginia or any other State needs.

Permanent roads are a good investment —not an expense

**90 Per Cent of World's Motor Cars on Our Highways**

There are 16,000,000 motor vehicles in the United States—approximately 90 per cent of all in the world.

This total is being increased at the rate of 4,000,000 a year.

What is the saturation point?

Ask any one of the 16,000,000 motorists trying to make headway through the countless traffic jams on some of our concrete highways. He will tell you, from the standpoint of comfort and safety in driving, the saturation point is already in sight.

Not a very encouraging outlook, is it, for the man about to buy his first automobile?

So you see car owners and prospective car owners are both interested—and have an immediate task confronting them.

What are you going to do about it? Even now you are curtailing the use of your car because you do not want to endure the discomfort, inconvenience and danger of traveling on congested, narrow highways.

Your highway officials need your support. They can't do much unless you stand squarely behind them.

To delay building more highways wide enough and strong enough to meet all the requirements of modern traffic will cost you more money than will an adequate system of Concrete Roads and Streets.
